PERSONAL PROJECTS

E Voting System using PHP (08/2023 - 01/2024)
- This system allows users to cast their votes electronically, eliminating the need for physical ballots and manual vote counting. It ensures the integrity of the voting process through encryption techniques confidentiality and accuracy of votes. Additionally, the system includes features such as candidate profiles, voter registration, real-time result tracking

Replica of my college website (06/2023 - 07/2023)
- Developed a replica of my college website using HTML and CSS. Included features such as course information, faculty details, event updates, and admission procedures to showcase web development skills.

Product landing Page (05/2023 - 06/2023)
- "Product Landing Page" project showcases my proficiency in HTML, CSS, and JavaScript for creating visually appealing, responsive web pages. It highlights product features, encourages conversions, and enhances user experience.
